

BK5

BIOETHANOL BURNER

ecosmar⁺
Fire

The original ethanol burner within the EcoSmart Fire range – and one of the most versatile. A core component of many portable Freestanding Fires, Fireplace Inserts and individually designed indoor and outdoor fires. You're only limited by your imagination.

Comprehensively tested, safety is a key consideration. A highly versatile and environmentally friendly fire design tool.

Global Compliance

All burners are UL Listed in accordance with ANSI/UL1370 in the USA, Certified by BSI in accordance with EN16647, and comply with the ACCC Safety Mandate for Australia.

Reliable Operation

BK's minimalist design and ability to withstand extreme heat result in consistent and reliable operation at all temperatures and permitted fuel levels.

Safe Filling

Perfectly aligned slider mechanism, filling point and fuelling system that allows an unobstructed view of the burner tank. This ensures the burner is not filled above the maximum capacity line.

An additional safety measure that prevents the filling point from being accessed while the slider is open. This ensures the flame is fully extinguished before the burner can be refuelled.

Colour

Available in Stainless Steel.

Seamless Construction

A deep-drawn fabrication process that eliminates the potential for dangerous leaks, while the standard provision of a top tray to hold the burner adds further peace of mind.

Flame Regulation

Easy flame control that allows you to regulate the amount of heat being generated, and therefore the amount of fuel consumed. This results in a highly economical and efficient burner.

Dedicated Filling Point

A separate filling point and jerry can equipped with a safety spout, allows the burner to be refuelled safely and easily. The spout rests on a plate within the filling point to decrease the risk of over-filling the burner and eliminating the usual splash and spills that would otherwise occur when fuel is decanted into the burner.

Top Tray

The Top Tray protects against heat transference and aids in the collection of accidental spillage.

To comply with EN 16647 the Top Tray must be installed before operating the burner.

Included Accessories

Jerry Can

Lighting Rod
+ Lighter

Operations Manual

Top Tray

BK5

Application	Indoor & Outdoor
Awards	2004 Winner Design Mark Australian International Design Awards Sydney (AUS)
Materials	Grade 304 Stainless Steel
Weight	7.6kg [16.6lbs]
Colour & SKU	 Stainless Steel ESF.1.B.BK5
Fuel Type	e-NRG Bioethanol

BURNER VENTILATION & EFFICIENCY*

Fuel Capacity	5 Litres [1.3 Gallons]
Heats on Average (when used indoors)	Over 35 square metres [376.7 square feet]
Fuel Consumption	0.64 L/h [0.17 Gal/h] on MAX
Thermal Output Net (MAX)	14 MJ/h - 13,000 BTU/h - 3.5 kW
Burn Time	7 - 11 hours (approx)
Minimum Room Size	70 cubic metres [2472 cubic feet] per fireplace.

Read the manual carefully before operating the burner. Physical model dimensions should be verified against cut out dimensions BEFORE installation begins to confirm tolerances align.

* These values are indicative only and may vary depending on the model purchased, installation, and the seasonal resource used to manufacture e-NRG.

Global Compliance

All burners are UL Listed in accordance with ANSI/UL1370 in the USA, Certified by BSI in accordance with EN16647, and comply with the ACCC Safety Mandate for Australia (except VB).
